## Hose Retriever Series

Fig. 610

The **610 Hose Retriever** suspends the fueling hose above the dispenser eliminating kinks and tangles while keeping the hose up off the drive. The 360 degree smooth rotating retriever head assists the operator in positioning the hose to the fueling point. The hose retriever reduces safety hazards at the fueling point and eliminates hose wear.

A heavy duty steel base is available to simplify retrofit installations saving time and money. Two 10-pound counterweights connect via stainless steel cable making for low maintenance and trouble-free counter movement. Extra weights are available to counter balance larger diameter hoses.

**Construction Details for Hose Retriever**

- Cast iron head (E-coated black)
- Stainless steel cable and connectors
