See Pumps & Accessories Price List for Limited Warranty details.

DuraMAC™ - Dual-Mode Duplex

Not all boosting applications require complicated boosting systems. The DuraMAC™ Boosting system is simple, versatile, sophisticated, and reliable. Quite simply, it is the world's most versatile boosting system for commercial or irrigation use.

120 Gallon/Minute (GPM) Max

| DuraMAC [™] Model | Description | Pump Boost | Amps | Voltage | Power | Pressure Reducing Valve recommended for installation with incoming pressure greater than: |
|--|---------------------|------------|------|-------------|-------|---|
| 17044C120PC2-D | 230V Booster System | 44 PSI | 7.0 | 230 - 60 Hz | 2 HP | 36 PSI |
| 17060C120PC2-D | 230V Booster System | 60 PSI | 8.0 | 230 - 60 Hz | 2 HP | 20 PSI |

Pressure tank required. See instruction manual for sizing information.

*Many plumbing codes do not recommend system pressure exceeding 80 PSI. Refer to local plumbing codes for maximum boosted pressure.

SUBMITTAL INFORMATION

- Easy set-up installation
- Digital control with dual modes of operation
- Durable stainless steel and no-lead brass connections
- TEFC single phase motor for quiet operation
- Electronics separated and sealed from waterway
- Pressure gauge included

- No-Lead brass check valve included
- Designed for Lead-Lag
- Up to 120 GPM
- 20 gallon pressure tank
- Stainless steel base
- Dry run protection

NO-LEAD: The weighted average of the wetted surface of this no-lead product contacted by consumable water contains less than one quarter of one percent (0.25%) lead.

DuraMAC™ Booster Pumps Residential | Light Commercial | Commercial

DuraMAC™ - Dual-Mode Duplex

See Pumps & Accessorie Price List for Limited Warranty details.

Control Features -

The DuraMAC™ Dual-Mode control has the flexibility to be run in two different modes.

PRESSURE MODE
START METHOD: Pressure Drop
STOP METHOD: Low Flow

In Pressure Mode, the control accurately measures pressure with a pressure transducer and starts the pump at an adjustable start pressure point. The pump will stop when the flow is less than 3 Gallons per Minute.

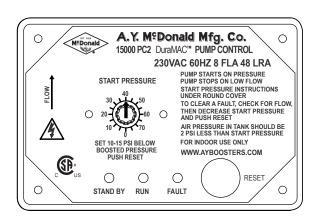

This smart system will only run the pump when water is in use. There is a preset 7 second delay after water is not flowing past the flow sensor to fully pressurize your system and eliminate water hammer.

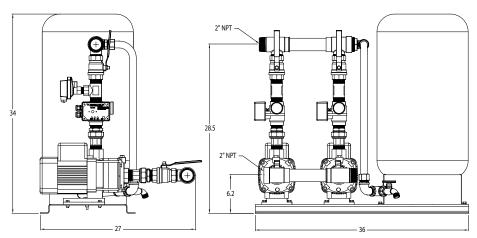

FLOW MODE START METHOD: Water Flow STOP METHOD: Low Flow In Flow Mode, the control will start and stop on flow, regardless of pressure. This method can be used for systems with minor leaking or when incoming pressure varies. The starting flow rate is approximately 5 Gallons per Minute. The pump will stop when the flow is less than 3 Gallons per Minute.

Materials of Construction

| Impellers | 304 Stainless Steel | | | |
|------------------------|---------------------|--|--|--|
| Pump Casing Inlet | 301 Stainless Steel | | | |
| Pump Casing Outlet | 301 Stainless Steel | | | |
| Pump Seal (stationary) | Silicon Carbide | | | |
| Pump Seal (rotating) | Carbon / NBR | | | |
| Diffuser | 304 Stainless Steel | | | |
| Union Connection | No-Lead Brass | | | |
| Check Valve | No-Lead Brass | | | |
| Pump Control | No-Lead Brass | | | |
| Motor - Single Phase | 2 HP TEFC | | | |
| Base | 304 Stainless Steel | | | |

Duplex base mounted with 20-gallon tank 2" NPT manifolds with ball valves.

NO-LEAD: The weighted average of the wetted surface of this no-lead product contacted by consumable water contains less than one quarter of one percent (0.25%) lead.
