

CardMaster with CM-VIC internet/cellular modem, and with CM-MLS-K2 Splitter. Splitter can serve 2, 3, or 4 two hose CardMasters.

Serial communications wiring from CM with internet/cellular modem and splitter to 2nd, 3rd, or 4th CardMaster.

CardMaster's Internet/Cellular option can be easily retrofitted in the field to existing CardMasters. The retro fit unit is the size of the small box shown above in the right hand unit. It installs between the CardMaster and it's pedestal, with minimal wiring.

Cardlock Vending is pleased to offer Internet/cellular data service for our CardMaster product line. The advantages of Cardlock Vending CM-VIC (Cellular Data Service) include:

- ▶ Installing land-line telephone service is expensive - save all that cost.
- ▶ CM-VIC price is less than half typical monthly land line business service, (approx per month \$16.75 versus \$50 to \$60), **a savings of \$30 to \$40 per Month. You also eliminate applicable long distance charges.**
- ▶ You can access your Internet CardMaster connection from your computer desktop (any or all your company computers, even at multiple company locations), from your laptop at home, in a hotel room, or any "WiFi" location. Flexibility, convenience, and efficiency!
- ▶ Connection privacy, via VPN (Virtual Private Network), eliminates "hackers" accessing your data, and prevents hackers use of your data line, which would increase your monthly costs. The fuel site CardMaster cellular modem is called by our VPN server (transparently to the user).
- ▶ Eliminates the expense of options such as RF (radio frequency), LAN (local area network), and telco (telephone modem) hard wiring back to the office or kiosk.
- ▶ Cardlock Vending provides dial in service support to sites we can access remotely. Currently this involves a CM-TLS line sharing device at the site, an expense. Internet/Cellular allows CVI to support your product without that expense (**saving \$695**), and still allowing Cardlock Vending to easily provide remote support for troubleshooting, and service assistance.
- ▶ The Internet/cellular modem comes installed in it's own enclosure; which bolts easily between the CardMaster and the pedestal.
