

Why pick and choose when you can get everything you need in a conventional hanging hardware solution from one trusted manufacturer? Franklin Fueling Systems offers a complete line of FLEX-ING™ brand conventional hanging hardware.

Conventional Nozzles

The FLEX-ING™ brand nozzle offering includes options for both gasoline and high-flow diesel applications that feature the form, fit, flow and function customers are used to.

Proven Curb Hose Options

The FLEX-ING™ brand lineup of curb hoses provides you with a quality solution for the transfer of fuel from the dispenser to the nozzle.

Break Aways and Swivel Adapters

The FLEX-ING™ brand ACCUBREAK™ Break Aways ensure protection from hazardous fuel spills while FLEX-ING™ brand swivels provide easy customer operation and allow smooth hanging hardware movement during fueling.

FLEX-ING™ brand
RE-STAGE™ Vapor Recovery
Replacement Adapters

Replace Decommissioned Vapor Recovery Hanging Hardware

With the FLEX-ING™ brand RE-STAGE™ Adapters, replacing existing Stage II Vapor Recovery hanging hardware with conventional hanging hardware is quick and easy. With options for converting Balance, Vacuum-assisted, or Healy Vacuum-assisted vapor recovery systems over to conventional dispensing systems, you can ensure you have the solution to replace any decommissioned Stage II Vapor Recovery system. Installation involves simply threading the adapter into the dispenser outlet and then threading the rest of the hanging hardware in-line with it.
