

HAND OSCILLATING PUMPS

Gorman-Rupp's HO Series hand pumps are high quality oscillating force pumps that are compact, self-priming and provide easy transfer of light to medium, mild-corrosive liquids such as gasoline, lube oil and diesel fuel. These pumps can also be used on critical military and marine applications where dependable, maintenance-free service is of vital importance.

These pumps are easy to install, easy to operate and require minimum maintenance.

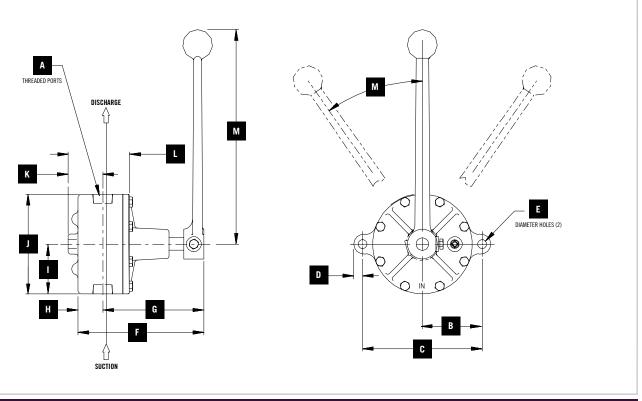

FEATURES

- Cast iron construction with Buna-N shaft seal and bronze valves and fiber gaskets
- Delivers 6 gpm (0,4 lps), 0.10 gallons per stroke
- Suction and discharge kit included (HO3/4A4-36DK only)
- Compact
- Maximum liquid temperature 120° F (49° C)
- Maximum operating pressure to 50 psi (3,4 bar)
- 2" drum kit standard (HO3/4A4-36DK only)
